

Tizen::Ui::Scenes::
IPanelFactory

```
classDiagram
    class Tizen_Ui_Scenes_IPanelFactory {
    }
    class HideltPanelFactory {
        +HideltPanelFactory()
        +~HideltPanelFactory()
        +CreatePanelN()
    }
    Tizen_Ui_Scenes_IPanelFactory <|-- HideltPanelFactory
```

The diagram illustrates a class hierarchy. At the top is the base class 'Tizen::Ui::Scenes::IPanelFactory', which is an interface with no methods or attributes shown. Below it is the derived class 'HideltPanelFactory', which implements the interface. The derived class has three public methods: a constructor, a destructor, and a 'CreatePanelN()' method. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.

HideltPanelFactory

+ HideltPanelFactory()
+ ~HideltPanelFactory()
+ CreatePanelN()
